WEIGHTS				
Gross Vehicle Weight (KG)	1880	1990	1920	2170

E & OE August 2025. *Fuel consumption figures are determined according to the WLTP test cycle. The fuel consumption you achieve under real life driving conditions and CO2 produced will depend upon a number of factors, including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load. Only compare fuel consumption and CO2 with other vehicles tested using the same technical procedures. For more information contact your local Opel Dealer. All diesel models feature BlueInjection. Vehicles with BlueInjection technology will need regular AdBlue® top-ups also between servicing requirements. An indicator integrated into the on-board computer will warn you when you need to top up. More information see www.opel.ie/adblue. In accordance with regulations R (EC) No. 715/2007 and R (EC) No. 692/2008 (in the versions respectively applicable).

Single-speed electronic drive selector

As the motor is an all-electric single-speed drive unit, there is no need for multiple gears. Instead, the shifter lets the driver select from the following:

- Park - Reverse - Neutral - Drive

Braking (for increased regenerative braking)

Drive Mode Selector

The driver can determine the driving style by selecting one of the following models:

- **Normal:** For a balanced drive that offers a compromise between performance and energy efficiency.
- **Sport:** For a dynamic drive with a responsive throttle and the highest top speed and torque.
- **ECO:** For maximum range and energy efficiency. The ECO mode deactivates all unnecessary range consuming features and reduces the top speed, torque and overall performance.

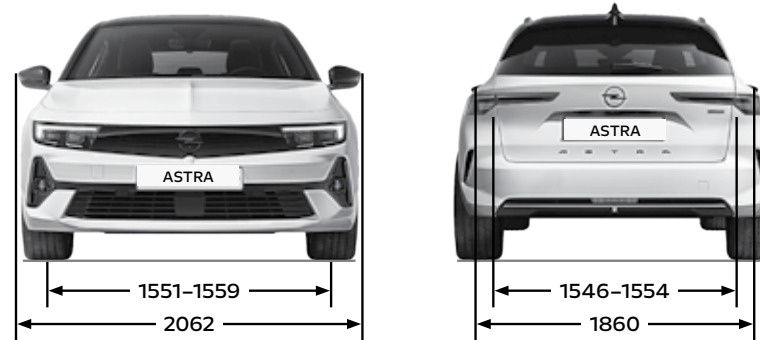

Drivetrain - Electric	
CO2 EMISSIONS	0g/km
MAXIMUM POWER	115kw (156PS)
MAXIMUM TORQUE	270NM (199lb.ft) @1750RPMs

AC CURRENT - HOME WALLBOX/PUBLIC CHARGER (7KW)	8h
AC CURRENT - PUBLIC CHARGER (11KW)	5h 45m
DC CURRENT - RAPID CHARGER (100KW)	26m (20-80%)
CHARGING CABLES	
MODE 3, 3 PHASE 22KW CABLE	Standard

The Astra Electric is a battery electric vehicle requiring mains electricity for charging. Range data given has been determined according to WLTP test procedure methodology. The figures shown are intended for comparability purposes only and should only be compared to other cars tested to the same technical standard. The range you achieve under real world driving conditions will depend upon a number of factors, including but not limited to: the accessories fitted (pre and post registration), charging frequency, personal driving style, vehicle load and route characteristics, variations in weather, heating/conditioning, pre-conditioning and battery condition. For more information, contact your local Opel Dealer. EAER - Equivalent all electric range. *WLTP preliminary.
