SUBARU

UNCHARTED

100% ELECTRIC

MODERN BY DESIGN.
SUBARU BY NATURE.

Built for explorers and made for everyday life, Subaru Uncharted combines a bold, sporty coupé design with responsive all-electric performance and genuine Subaru capability.

Available with re-engineered Symmetrical All-Wheel Drive, a range of up to 590 km and the ability to charge from 10% to 80% in as little as 28 minutes*, this versatile crossover delivers the confidence to take you from urban streets to open summits.

We changed the power source. We kept the DNA.

*Charge times can vary depending on many factors, including temperature, and condition of the vehicle and battery.

UNCHARTED

POWER AT YOUR FINGERTIPS.

The Subaru Uncharted delivers responsive performance that's ready whenever you are. With instant power delivery and smooth acceleration, every journey feels effortless, whether you're joining a motorway, overtaking with confidence or exploring winding country roads. For a more engaging drive, steering wheel-mounted paddle switches allow you to take control and select your preferred gear ratio, putting performance and precision right at your fingertips. It's a driving experience that combines everyday comfort with the confidence and enjoyment Subaru is known for.

BATTERY

At the heart of the Subaru Uncharted is a high-capacity lithium-ion battery with advanced water-cooling technology. By helping to regulate battery temperature in a wide range of conditions, it delivers reliable performance and efficiency, even during rapid charging, long-distance journeys and demanding weather conditions. The result is confidence-inspiring electric capability, every day.

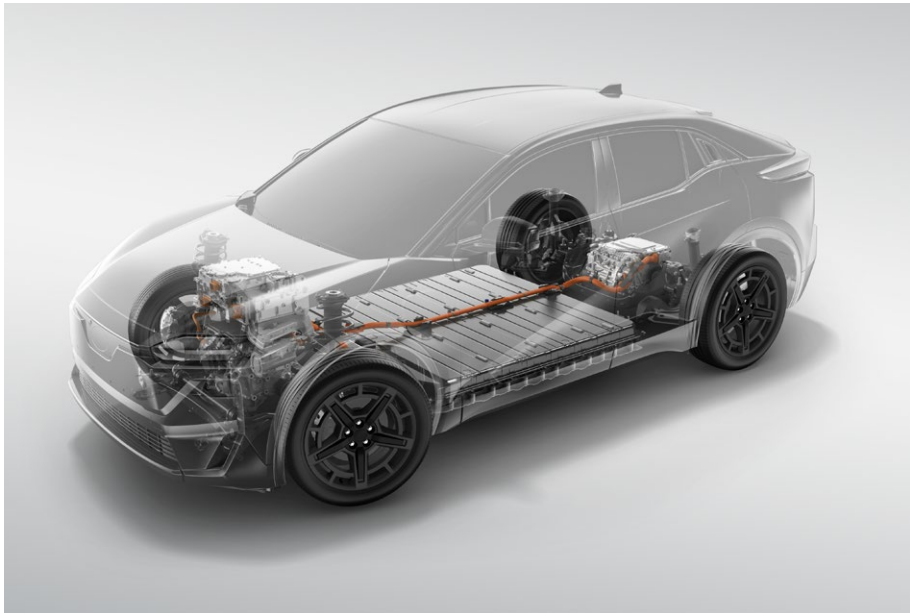

CHARGING

The Subaru Uncharted makes electric driving easy, combining impressive range with fast and convenient charging. With 150kW DC rapid charging, the battery can charge from 10% to 80% in as little as 28 minutes*. A 22kW AC onboard charger is also available, while the smartphone app lets you monitor charging remotely for added convenience.

CHARGING PERFORMANCE AT LOW TEMPERATURES

A dedicated battery heater helps maintain charging performance in cold weather, while battery pre-conditioning automatically warms the battery when a charging station is set as your destination. The result is faster, more efficient charging, even at temperatures as low as -10°C.

*Charge times can vary depending on many factors, including temperature, and condition of the vehicle and battery.

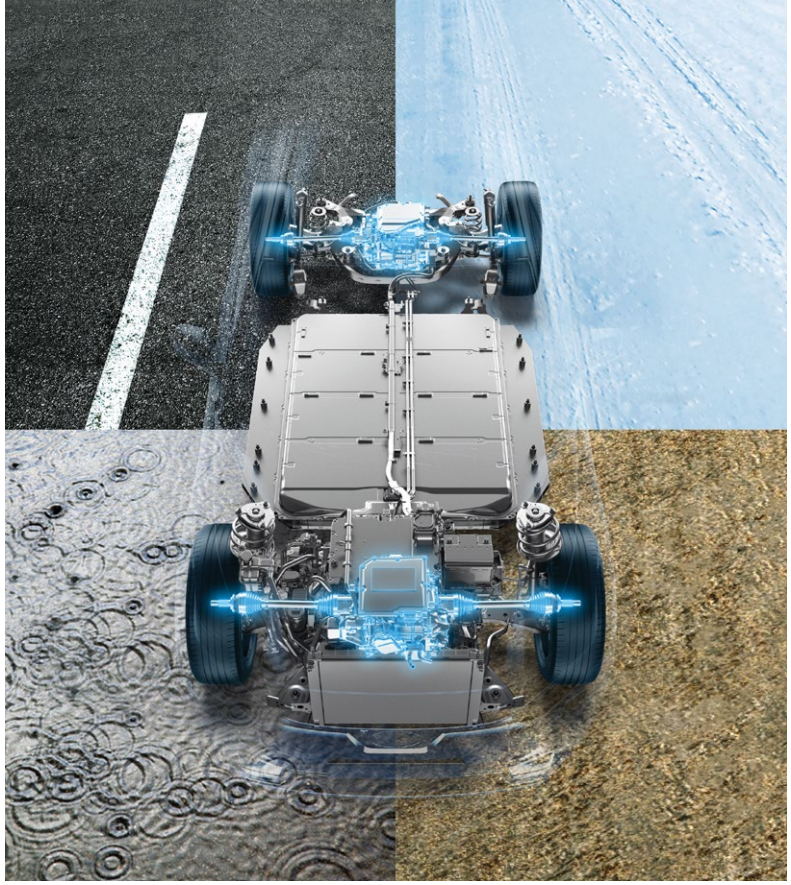

BUILT TO EXPLORE.

Drawing on decades of Subaru engineering expertise, the Uncharted pairs available Symmetrical All-Wheel Drive with X-MODE for enhanced confidence on challenging terrain. Using independently controlled front and rear electric motors, the system delivers precise power distribution for outstanding traction, stability and control. Whether navigating wet roads, tackling loose surfaces or exploring beyond the beaten track, the Uncharted provides the sure-footed performance Subaru is renowned for.

CLEARANCE BY DESIGN

The Uncharted is equipped with the ground clearance needed to go rough-road. In addition, approach, departure and breakover angles are calculated to protect the body and battery.

AWD SYSTEM

Bringing Subaru's renowned all-wheel drive expertise to the electric era, the Uncharted features electric motors on both the front and rear axles for intelligent, responsive power distribution. By continuously managing torque and brake force at each wheel, the system maximises traction, stability and control in changing road conditions. The result is confident handling, reassuring grip and the peace of mind to enjoy every journey, whatever lies ahead.

e-SUBARU GLOBAL PLATFORM

Built on the dedicated e-Subaru Global Platform, the Uncharted has been designed specifically for all-electric driving. Its high-capacity battery is positioned beneath the floor, lowering the centre of gravity for more responsive handling while creating a spacious, comfortable cabin. By integrating the battery structure into the vehicle's body, the platform also enhances overall rigidity, delivering greater stability, refinement and driving confidence on every journey.

POWER UNIT (MOTOR/BATTERY)

The compact and highly efficient eAxle delivers instant torque for smooth, responsive acceleration whenever you need it. A powerful 167 kW* front electric motor provides strong, linear performance, while an advanced water-cooling system helps maintain optimum battery temperature for reliable power delivery and consistent performance in a wide range of driving conditions.

*SR model is equipped with a 124.4 kW motor.

X-MODE

With X-MODE*, the Subaru Uncharted is engineered to take on challenging conditions with confidence. Designed to optimise traction and control on surfaces such as snow, mud and loose gravel, the system automatically adjusts power delivery, braking and drive force to help maintain grip when it's needed most. Combined with the dual-motor AWD system, X-MODE provides sure-footed performance and enhanced stability across a wide range of terrain. For added reassurance, the Panoramic View Monitor with Underfloor See-Through View** offers a clear view of your surroundings, helping you navigate obstacles and manoeuvre with confidence both on and off the beaten track.

*Available on AWD model only.
**Available on LR and AWD model only.

MADE FOR CONFIDENT CONTROL.

The Uncharted's cabin is shaped around Subaru's commitment to visibility, simplicity and ease of use. A clean, horizontal dashboard design creates an open and spacious feel, while key vehicle information is positioned for quick, intuitive access.

With clear displays and thoughtfully placed controls, every element is designed to help you stay focused, informed and confident behind the wheel.

LCD METRE DISPLAY

The top-mounted 7" TFT LCD driver info display features an advanced hoodless design. Positioned above the oval steering wheel, its layout minimises eye movement helping the driver to stay focused on the road.

ROTARY SHIFTER

The Uncharted's compact rotary gear selector brings modern simplicity to every journey. Easy to operate and thoughtfully positioned, just press and turn to select Drive or Reverse, while a dedicated Park button allows you to engage Park with a single touch, helping you stay focused on the road ahead.

14" TOUCHSCREEN DISPLAY

The large centre display offers high visibility and minimal reflectivity for readability. Its intuitive touchscreen ensures effortless operation, allowing users to access information comfortably and safely.

WIRELESS CHARGER

A wireless charger for two smartphones, compatible with the Qi standard*.

*Qi wireless charging may not be compatible with all mobile phones.

HARMAN KARDON® AUDIO SYSTEM*

Six front and four rear speakers plus woofer, specifically tuned for the Uncharted, provide high-quality sound for all passengers.

*Available on LR and AWD models only.

USB C PORTS

Four USB C ports, two at the front and two at the rear, allow convenient charging of smartphones and tablets, from anywhere in the vehicle.

COMFORT IN EVERY ENVIRONMENT.

The Uncharted blends sleek fastback styling with the versatility and practicality of an SUV. Its cleverly designed interior features a flat rear floor and generous headroom, creating a spacious, open feel for all passengers.

The thoughtfully designed cockpit enhances visibility, while the panoramic glass roof fills the cabin with natural light, creating a bright and airy atmosphere. Combined with the smooth, quiet refinement of electric driving, every journey is more comfortable, helping everyone arrive relaxed and refreshed.

FIXED PANORAMIC ROOF (WITH ELECTRIC SUNBLIND)*

The panoramic glass roof floods the cabin with natural light, enhancing the sense of space and providing expansive views above. For added comfort, a power-operated sunblind helps reduce glare and heat from direct sunlight.

*Available on AWD model only.

HEATED SEATS

With three adjustable heat settings, the front seat heaters provide targeted warmth where it's needed most, including the back and thighs, helping you stay comfortable and relaxed on colder days.

COMPACT YET CAPABLE.

The Uncharted's spacious and versatile luggage compartment is designed to fit seamlessly into everyday life. A wide tailgate opening makes loading and unloading effortless, while the 60:40 split-folding rear seats provide the flexibility to carry larger items when needed.

Whether it's the weekly shop, sports equipment or luggage for a weekend escape, giving you the flexibility to make the most of every journey.

POWERED TAILGATE

The powered tailgate* allows instant access to the boot at the push of a button, while its adjustable opening angle ensures added convenience tailored to your needs.

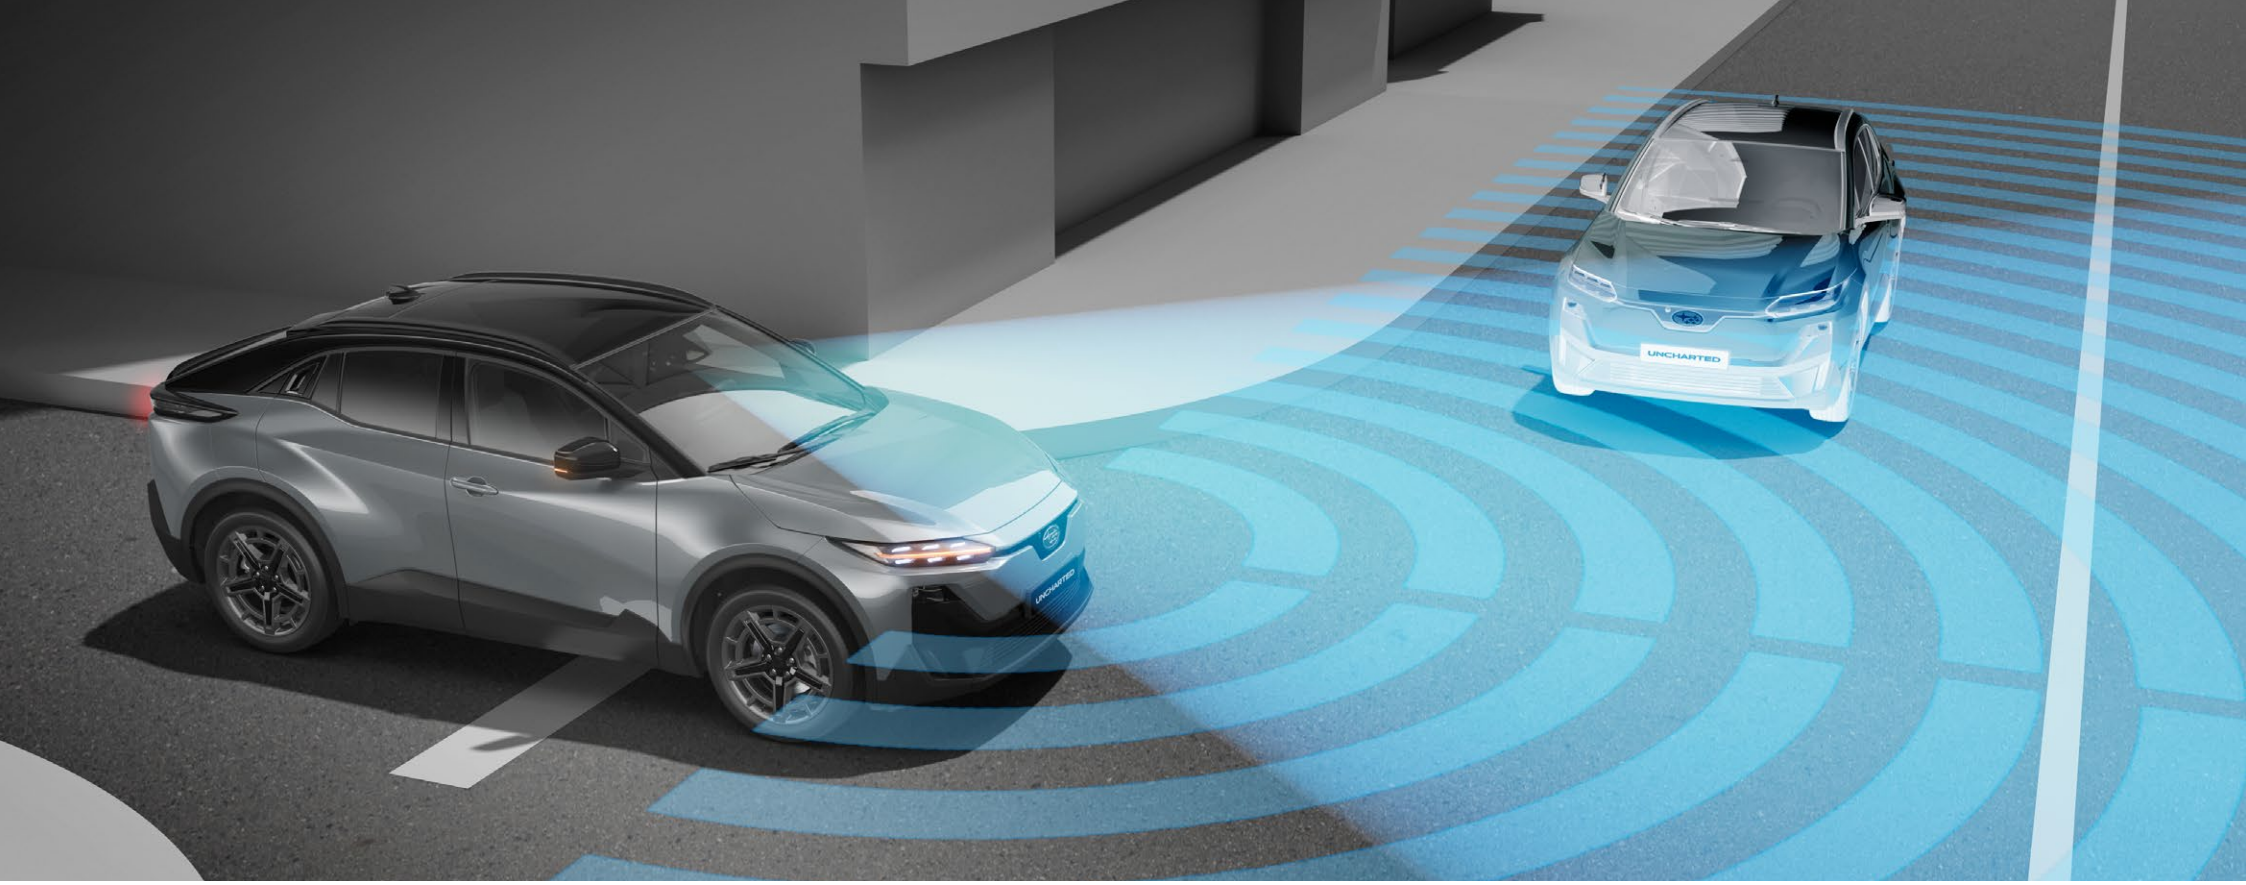

*Available on LR and AWD model only.

BOOT STORAGE

The practical deck board allows you to adjust the luggage floor height to two levels – upper for easier loading and unloading, or lower to expand cargo space for larger items.

ADVANCED SAFETY FOR ULTIMATE PEACE OF MIND.

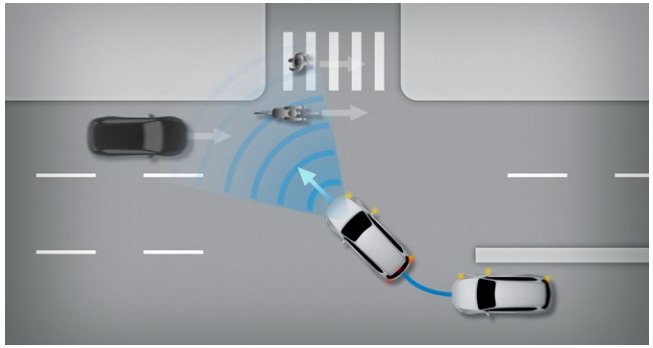

SUBARU SAFETY SENSE

At Subaru, we believe all-around safety is essential – not an optional extra – and it is our ambition to eliminate traffic accident deaths involving Subaru vehicles by 2030. An important part of that is pre-collision safety: making every effort to ensure an accident never happens in the first place. That's why we created Subaru Safety Sense* and Advanced Safety Technology for the Uncharted, a cutting-edge driving support system that sets new standards for safety performance.

Like a second pair of eyes for the road ahead, Safety Sense uses a wide-angled monocular camera with a high-resolution sensor and radar to precisely determine shape, speed and distance – meaning it not only detects vehicles but also motorbikes, bicycles and pedestrians. When a potential hazard is identified, it warns the driver (and even applies the brakes, if necessary) to help avoid an accident.

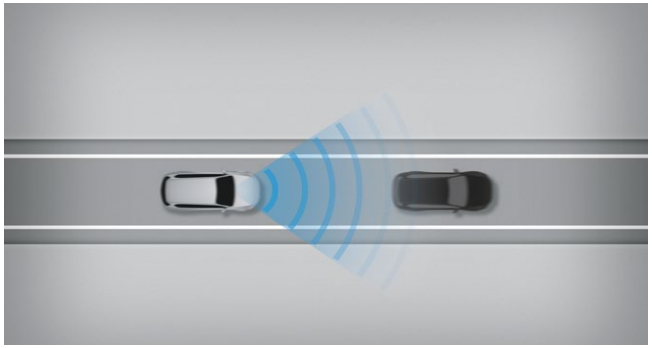

Uncharted also features a full suite of innovative collision prevention and avoidance systems, as well as the Subaru e-Global Platform, our most rigid platform ever, giving the driver ultimate peace of mind.

*Subaru Safety Sense is a driving support system which may not operate optimally under all driving conditions or for all objects. The driver is always responsible for safe and attentive driving and observance of traffic regulations. See Owner's Manual for complete details on system operation and limitations for Subaru Safety Sense including functions in this brochure.

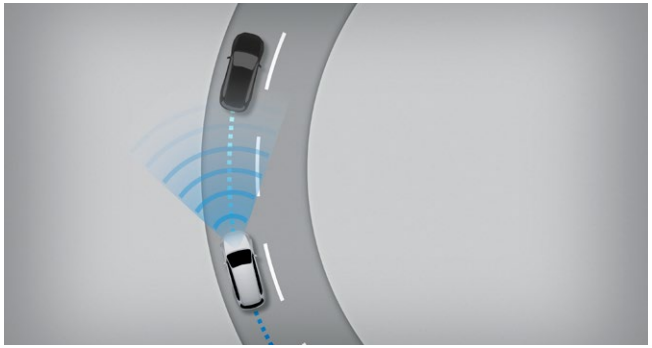

PRE-COLLISION SYSTEM (PCS)

The Pre-Collision System scans the road ahead for vehicles, pedestrians and cyclists, and recognises when there's a possibility of a collision. If a potential collision is detected, the system activates visual and audible warnings to alert the driver. If the driver fails to take evasive action, the brakes will be applied automatically to either prevent an accident entirely or reduce the severity of an impact, depending on speed.

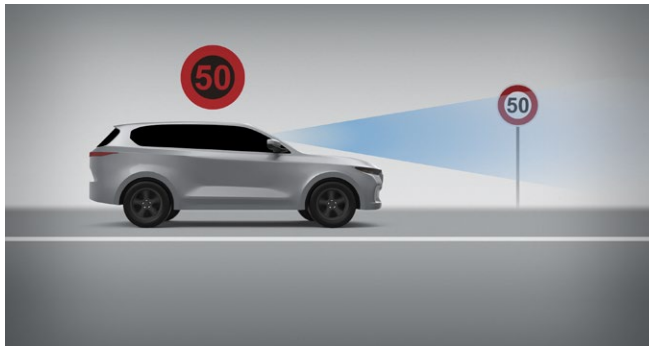

DYNAMIC RADAR CRUISE CONTROL (DRCC)

Dynamic Radar Cruise Control allows the driver to set vehicle speed and distance to the car in front. It constantly monitors distance and speed, then adjusts the speed accordingly to remain in line with the traffic flow. Designed for use on motorways and similar roads, DRCC improves driver comfort and convenience on long drives.

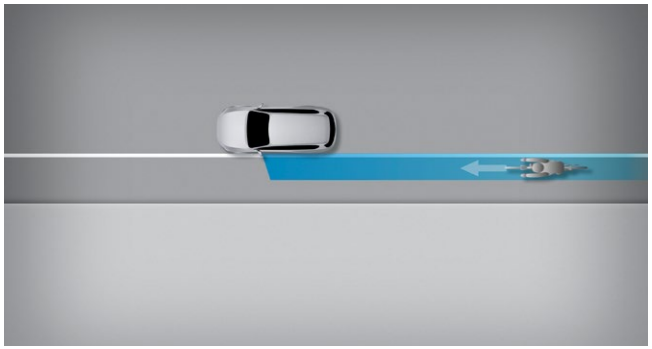

LANE TRACING ASSIST (LTA)

When Dynamic Radar Cruise Control is in use and registering lane markers or a preceding vehicle, Lane Tracing Assist holds a driving position near the centre of the lane or assists with steering to keep following the vehicle in front.

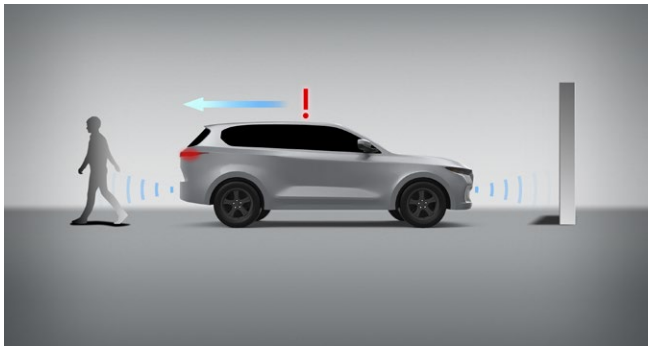

ROAD SIGN ASSIST (RSA)

Road Sign Assist recognises the road signs ahead and displays the applicable speed limit or overtaking restrictions on the instrument panel. If the driver isn't following a road sign indication, the system will provide a visual and audible warning, helping to prevent unintended speeding violations.

SAFE EXIT ASSIST (SEA)

When Uncharted is stationary, a rear lateral side radar detects vehicles or bicycles approaching from behind and alerts the driver to potential collisions while exiting the car with a warning light in the door mirror and red illumination inside the door handle. If a door is still opened, a visual and audible warning activates to alert the driver.

PARKING SUPPORT BRAKE (PKSB)

Sensors detect the presence of pedestrians in Uncharted's path when the vehicle departs or is reversing and warns the driver with an audio alert. If the system judges that a collision is about to happen, it automatically applies the brakes to avoid or reduce injuries or damage.

STAY CONNECTED.

Stay connected on the go, wherever you go – and discover a whole new level of connectivity and convenience. Connected to both the vehicle itself and the in-car multimedia system, the Subaru Care app runs on your smartphone and / or tablet. It enables you to remotely access and control a whole range of information and functions, keeping you connected with your Uncharted – even when you're not in it.

REMOTE CHARGING

Charge your Uncharted remotely from the palm of your hand with the Subaru Care app. You can not only check the battery status and track charging progress but also schedule your charging time so you can take advantage of cheaper off-peak electricity tariffs.

SEND TO CAR

Plan your journey directly from your phone and send it to your navigation system. Let the car take care of planning your charging stops including battery preconditioning to improve charging efficiency.

SUBARU CARE APP FEATURES.

CHARGING NETWORK

Get access to more than 900,000 charging points across Europe, unlock them easily via the Subaru Care app or RFID card. View your complete charging history and get billed on a monthly basis.

REMOTE AIR CONDITIONING

Your Uncharted, your way. That's the beauty of remote climate control, which lets you schedule the car to be pre-heated or pre-cooled at a specific time, so you'll always head off in absolute comfort. Ideal for cold winter mornings or hot summer days.

REMOTE SECURITY CHECK

Use the app to remotely check if Uncharted's doors are securely locked and the windows closed. If there's a problem, the app will enable you to lock the doors without even having to leave your house.

FIND MY CAR

Locate your Uncharted wherever you parked it or spot it in a busy car park by activating its hazard lights for 30 seconds. You can even share the vehicle location with others via various messaging platforms.

ALERTS

Be notified of any warning events occurring to your Uncharted or consult information about warning lights any time.

eCALL

The system automatically notifies the eCall centre if the airbags deploy and sends location, time and VIN to the operator to assist in the dispatch of emergency vehicles. Or you can press the manual SOS button to call the emergency services directly to report an accident. Help will be sent to the GPS location of your vehicle.
